Missouri University of Science and Technology's mission is to integrate education, research and application to create and convey knowledge that serves our state and helps solve the world's great challenges. In a world growing increasingly dependent on science and technology, tomorrow's graduates must be prepared to be leaders in more than just their chosen professions. They must also be leaders in business, in government, in education and in all aspects of society. Missouri S&T is dedicated to providing leadership opportunities for its students. Getting an excellent technological education is only part of the educational experience that Missouri S&T offers. Missouri S&T provides a full range of engineering and science degrees, coupled with business and liberal arts degrees and programs that are vital to the kind of comprehensive education that turns bright young men and women into leaders.

Missouri S&T is nationally recognized for its excellent undergraduate engineering programs, and is distinguished for producing cutting-edge research and key technologies vital to the economic success of Missouri and the nation. Missouri S&T has a distinguished faculty dedicated wholeheartedly to the teaching, research and creative activities necessary for scholarly learning experiences and advancements to the frontiers of knowledge. Missouri S&T has excellent physical facilities, which support the best possible education in the liberal arts, humanities, engineering, science, applied science and selected interrelated fields.

Missouri S&T's programs in science, engineering and business, its technology transfer programs, its leadership opportunities, and its learning environment are all integral parts of the total educational package available.

Mission Statement
Missouri S&T integrates education, research and application to create and convey knowledge that serves our state and helps solve the world’s great challenges.

Vision
Missouri S&T will be the leading public technological research university for discovery, creativity and innovation.
