ENGINEERING EDUCATION CENTER AT ST. LOUIS (EEC)

Graduate Center of Missouri S&T in West County
Victor Birman (Director)

The Missouri S&T Engineering Education Center, located at 12837 Flushing Meadows Drive, offers Missouri S&T graduate courses and degrees to working engineers and scientists in the St. Louis area. The courses, offered in the evenings, are credit courses applicable to M.S. or Ph.D. degrees. In addition, the Center offers numerous graduate certificate programs. Most of the courses can also be taken by non-degree candidates for personal enhancement.

The M.S. may be earned in aerospace, civil, computer, electrical, environmental, geotechnical, manufacturing and mechanical engineering, computer science, information science and technology, systems engineering and engineering management.

Requirements for the M.S. degree at the Missouri S&T Engineering Education Center are identical to those on the Rolla campus. Courses are taught by Missouri S&T faculty and by Missouri S&T-approved adjunct faculty (prominent engineers and scientists).

The center was established in 1964, as a part of the continuing education programs at Missouri S&T. Over 2,700 engineers obtained M.S. degrees at the Center.
