Degree Programs

Missouri S&T offers bachelor of science (BS) and bachelor of arts (BA) degrees. You can major in engineering, science, business, or the liberal arts. You can get a background for law or medicine or other professional studies.

In many disciplines there are emphasis areas which are areas of concentration within a degree program. If you choose an emphasis area, you will take some of your elective hours in specified courses in that area. Your advisor can guide you toward the election of courses you should take if you choose an emphasis area.

Degree programs and emphasis areas are listed below. Degree programs are in capitals, emphasis areas are lower case subheads followed by degree abbreviation if restricted to that degree.

AEROSPACE ENGINEERING (BS)

APPLIED MATHEMATICS (BS)
- Actuarial Science
- Algebra/Discrete Mathematics
- Applied Analysis
- Computational Mathematics
- Secondary Education
- Statistics

ARCHITECTURAL ENGINEERING (BS)
- Construction Engineering & Project Management
- Construction Materials
- Environmental Systems for Buildings
- Structural Engineering

BIOLOGICAL SCIENCES (BA, BS)
- Pre-Medicine (BA)
- Secondary Education (BA)

BUSINESS AND MANAGEMENT SYSTEMS (BS)
- E-commerce
- Enterprise Resource Planning
- Finance
- Human Computer Interaction
- Management Information Systems
- Marketing

CERAMIC ENGINEERING (BS)

CHEMICAL ENGINEERING (BS)
- Biochemical Engineering

CHEMISTRY (BA, BS)
- Biochemistry (BS)
- Polymer & Coatings Science (BS)
- Pre-Medicine (BS)
- Secondary Education (BA)

CIVIL ENGINEERING (BS)
- Construction Engineering
- Environmental Engineering

COMPUTER ENGINEERING (BS)
- Computational Intelligence
- Computers & Architecture
- Embedded Computer Systems
- Integrated Circuits & Logic Design
- Networking & Software Engineering
- Security & Reliability

COMPUTER SCIENCE (BS)

ECONOMICS (BA, BS)
- Economics/Business (BS)
- Secondary Education (BA)

ELECTRICAL ENGINEERING (BS)
- Circuits & Electronics
- Communications & Signal Processing
- Computer Engineering
- Controls & Systems
- Electromagnetics
- Optics & Devices
- Power & Energy

ENGINEERING MANAGEMENT (BS)
- Industrial Engineering
- Management of Technology
- Manufacturing Engineering
- Packaging Engineering
- Quality Engineering

ENGLISH (BA)
- Secondary Education

ENVIRONMENTAL ENGINEERING (BS)

GEOLOGICAL ENGINEERING (BS)
- Engineering Geology & Geotechnics
- Environmental Protection & Hazardous Waste
- Groundwater Hydrology & Contaminant Transport
- Petroleum, Energy & Natural Resources
- Quarry Engineering

GEOLOGY AND GEOPHYSICS (BS)
- Geochemistry
- Geology
- Geophysics
- Groundwater & Environmental Geochemistry
- Petroleum Geology

HISTORY (BA)
Secondary Education

INFORMATION SCIENCE & TECHNOLOGY (BS)
Enterprise Resource Planning
Human Computer Interaction

MECHANICAL ENGINEERING (BS)
Control Systems
Energy Conversion
Environmental Systems
Instrumentation
Manufacturing Processes
Materials Science
Mechanical Design and Analysis
Thermal Science

METALLURGICAL ENGINEERING (BS)
Chemical Metallurgy
Manufacturing Metallurgy
Physical Metallurgy

MINING ENGINEERING (BS)
Coal
Explosives Engineering
Mining & the Environment
Mining Health & Safety
Quarry Engineering
Sustainable Development

MULTIDISCIPLINARY STUDIES (BA)

NUCLEAR ENGINEERING (BS)

PETROLEUM ENGINEERING (BS)

PHILOSOPHY (BS)

PHYSICS (BS)
Applied Physics
Geophysics
Secondary Education

PSYCHOLOGY (BA, BS)
Cognitive Neuroscience
Human Resources/Personnel
Human Services
Psychology of Leadership
Secondary Education
Usability of Technology

TECHNICAL COMMUNICATION (BS)

Bachelor of Arts Degree

General Requirements
This degree can be earned in the following areas: biological sciences, chemistry, economics, English, history, multidisciplinary studies, philosophy, and psychology.

A minimum of 120 credit hours is required for a bachelor of arts degree with an average of at least two grade points per credit hour to be obtained. At least 45 hours of the student’s work must be taken of the upper-class (course numbered 3000 or above) level.

Requirements for the bachelor of arts degree follow:

I. Basic Skills and Concepts (a)
1. Composition: ENGLISH 1120 and one additional three hour composition course (6 hrs).
2. Western Civilization (HISTORY 1100 and HISTORY 1200) 6 hrs.
3. Foreign languages, (c)(d) 12 hours of a single foreign language or 16 hours (8+8) of two foreign languages.
   A. At least three semesters of basic study in a single foreign language or two semesters in each of two foreign languages: French, German, Russian, Spanish, or an approved substitute language.
   B. One year of basic study in one foreign language, either French, German, Russian, Spanish, or an approved substitute, and a humanities or social sciences course taught in a foreign country and employing the language of that country.
   C. One year of basic study in each of two foreign languages: French, German, Russian, Spanish, or an approved substitute language.

II. General Education Requirements
1. Sciences (12 hrs.): At least one course taken in each of the biological (biological sciences), physical (chemistry, geology and geophysics, and physics), and mathematical (mathematics/ statistics and computer science) sciences, but not to include MATH 1101 or COMP SCI 1010. A laboratory also may count – at the discretion of the student’s major department – toward the total requirement.
2. Humanities (12 hrs.): At least one course in each of the three areas of literature (English and American), philosophy, and fine arts (art, music and theater), but not to include studio and performance offerings. This requirement is exclusive of courses in the student’s major field.
3. Social Sciences (12 hrs.): Courses in at least two of the following areas: economics, political science, psychology, and sociology. This requirement is exclusive of courses in the student’s major field.

III. Major Field Requirements
1. Specific major field requirements in each discipline are given in the entry of that discipline.
2. A cumulative grade point average of 2.0 must be earned in all course work taken in the major field. Upper-class (3000- and 4000-level) courses completed with grades of “D” may not be included in the major field without the approval of the chairman of the department concerned.
3. At least nine hours of upper-class work in the major field must be completed in residence at Missouri S&T.

IV. Minor Field Requirements
1. Specific minor field requirements in each discipline are given in the entry of that discipline.
2. A cumulative grade point average of 2.0 must be earned in all course work required in the minor field.
3. A least six hours of work in the minor field must be completed in residence at Missouri S&T.
V. Elective Credits
1. In consultation with his or her advisor, each student will elect sufficient additional courses to complete a minimum of 120 credit hours.
2. Basic ROTC (military science and aerospace studies) may be taken in the freshman and sophomore years. Up to 12 credit hours (depending on the student’s major) of advanced courses in ROTC may be credited toward a degree.

Notes
(a) For transfer students these requirements may be met by equivalent course work completed at other institutions.
(b) An entering student may quiz out of ENGLISH 1120 Exposition And Argumentation (3 hours) on the basis of Advanced Placement (AP) standing, through various examinations offered by the College-Level Examinations Program (CLEP subject exams) through the Missouri S&T placement examination program based on Missouri College English Test (MCET) and Cooperative School and College Ability Test (SCAT) scores.
(c) This requirement cannot be satisfied through foreign civilization courses which are taught in English. A student who has studied French or Spanish prior to enrolling in courses at Missouri S&T will be required to take a placement exam that will determine the appropriate course for his/her level of preparation. Students may not enroll in or receive credit for a course taken below their placement level. All course placement requires instructor’s approval. A student may receive foreign language credit by examination with a score of 3, 4, or 5 on the language or literature AP exam or with a score in the 75th percentile or above on the CLEP exam.
(d) Upon approval of the department chair students seeking teacher certification may substitute 11-16 hours of certification courses for their foreign language requirement. Students electing to make this substitution must complete the certification program to receive their chosen bachelors of arts degree.
(e) The mathematics/statistics requirement may be satisfied by (1) examination or (2) the presentation of 2.5 high school units, including 1.5 units of algebra and excluding general mathematics. The student will not, however, receive hour credit so he or she must take another course to fulfill the 12 hours.

VI. General Education Communications Requirements
Each department will provide students with opportunities to enhance their writing and speaking skills (beyond the required class) by requiring that they complete at least two communications intensive courses (CI), at least one of which should be in the student’s major. Communication intensive (CI) courses may be focused on writing, speaking, or combinations thereof. Two communications emphasized (CE) courses may be used at the equivalent of one CI course (for example, four CE courses would substitute for two CI courses, but an appropriate substitute for the one CI course in the student’s major). These requirements will be formally tracked and monitored by the degree audit to ensure that each graduating student is meeting the communications component of the general education requirement.

VII. Experiential Learning Requirement
All students at Missouri S&T are required to participate in appropriate experiential learning activities. Experiential learning refers to learning stimulated by a variety of structured activities that differ significantly from the traditional lecture format. Experiential learning activities are designed to require students to go beyond mastering basic skills and knowledge in the application of that material to problem solving challenges. These activities involve collaboration and reflective learning and allow students to learn in environments that align with their aptitudes.

Bachelor of Science Degree
This degree can be earned in the following areas: aerospace engineering, architectural engineering, biological sciences, business and management systems, ceramic engineering, chemical engineering, chemistry, civil engineering, computer engineering, computer science, economics, information science and technology, electrical engineering, engineering management, environmental engineering, geological engineering, geology and geophysics, mathematics, mechanical engineering, metallurgical engineering, mining engineering, nuclear engineering, petroleum engineering, physics, psychology, and technical communications.

Accreditation
Missouri S&T bachelor’s level engineering programs in aerospace engineering, architectural engineering, ceramic engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, engineering management, environmental engineering, geological engineering, mechanical engineering, metallurgical engineering, mining engineering, nuclear engineering, and petroleum engineering are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Missouri law requires that all applicants for registration as professional engineers be graduates of engineering programs accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org, or possess an education which includes at the minimum a baccalaureate degree in engineering and which, in the opinion of the registration board, equals or exceeds the education received by a graduate of a program accredited by EAC/ABET. Applicants who receive advanced degrees from Missouri S&T engineering programs, but do not have undergraduate engineering degrees, may not be eligible for registration in Missouri. Such applicants may wish to consider studying toward a bachelor’s degree in their chosen engineering field. If so they should consult with their department chairman regarding specific requirements. All eligible graduates are strongly encouraged to seek professional engineer registration.

Missouri S&T bachelor’s level computer science program is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

Minimum Requirements
A minimum of 120 credit hours is required for a Bachelor of Science degree with an average of at least two grade points per credit hour to be obtained. The following general education requirements must be met:

1. Communications
   A. ENGLISH 1120
   B. One writing intensive course in major OR two writing emphasized courses in major
   C. One writing intensive course out of major OR two writing emphasized courses out of major

2. Humanities plus Social Sciences
   A. 21 credit hours (must be content approved by the department and school)

3. Mathematics and Science
   A. Total of 18 credit hours
B. College algebra or higher
C. May include up to 3 credit hours of psychology

Experiential Learning Requirement
All students at Missouri S&T are required to participate in appropriate experiential learning activities. Experiential learning refers to learning stimulated by a variety of structured activities that differ significantly from the traditional lecture format. Experiential learning activities are designed to require students to go beyond mastering basic skills and knowledge in the application of that material to problem solving challenges. These activities involve collaboration and reflective learning and allow students to learn in environments that align with their aptitudes.

Dual Bachelor’s Degree
Combination curricula leading to two baccalaureate degrees can be arranged in any two fields. The amount of additional credit required for the second baccalaureate degree will be based on the student’s educational background and determined for each case by the academic department which offers the curriculum leading to the second degree. The chair of the department will submit a list of the specific course and credit hour requirements, together with the student’s transcript, to the provost for approval. This list will then be forwarded to the registrar and constitute the official requirement for the second degree. Since the B.A. degree is unspecified as to major there will be no dual bachelor of arts degree offerings. A student entering Missouri S&T with a baccalaureate degree must take a minimum of 30 hours to receive another bachelor’s degree.

When requirements for a degree in two departments have been completed without either degree being awarded, both degrees may be awarded at the same commencement.

Engineering Degree Requirements
All engineering degree programs must be consistent with the following minimum requirements.

The requirements of the degree program shall consist of 128-132 credit hours. Additional hours may be required for specific choices of electives or emphasis areas. Courses that are at a lower level of coverage than the required courses in the curriculum (e.g. algebra, trigonometry, intro to physics, etc.) may not be counted toward the degree program credit hours. An average of at least two grade points per credit hour must be obtained for all credits counted toward the degree. In addition, an average of at least two grade points per credit hour must be obtained for all credits taken in the student’s major department.

The degree program shall include all courses in the common engineering freshman year, as listed in the current catalog under the Freshman Engineering Program.

The degree program shall include a minimum of 21 credit hours as follows:

- ENGLISH 1120
- HISTORY 1200, HISTORY 1300, HISTORY 1310, or POL SCI 1200
- ECON 1100 or ECON 1200
- The remaining courses must be chosen from the list of approved humanities/social sciences courses, published on the website for the
