Information Science and Technology (IS&T) offers an M.S. degree program. Information technology has transformed every aspect of our economy and society. Rapid spread of technology has generated the need for highly trained professionals to implement and maintain information systems. The M.S. in information science and technology is designed to educate students in the design, development, and successful application of information systems in organizations.

Also offered are a number of graduate certificates:

- AI, machine learning and automation in business
- Business analytics and data science
- Business intelligence
- Business project management
- Cybersecurity and information assurance management
- Digital media and web design
- Digital supply chain management
- Electronic and social commerce
- Enterprise resource planning
- Entrepreneurship and technological innovation
- Finance
- Financial technology
- Human-computer interaction and user experience
- Information systems project management
- Management and leadership
- Mobile business and technology

These graduate certificates are intended for students who wish to specialize and for working professionals who want to stay ahead of rapidly changing technology. Each graduate certificate program consists of a four-course sequence from existing graduate-level courses. Certificate credits earned by students admitted to the M.S. program will count toward their master’s degree. Students admitted just to the certificate program will have non-matriculated status. However, if they complete the four-course sequence with a grade of “B” or better in each of the courses taken, they will be admitted to the M.S. program if they so choose. In addition, successful completion of the graduate certificate offered in the business program, with grades of “B” or better in each of the courses, will also enable admission to the IS&T M.S. program. Admitted students must still meet the admissions requirements relative to undergraduate coursework prerequisites.

The faculty is active in studying the design and application of the web and has external support for research. Research experiences are integrated into the classroom experience. Specially equipped research laboratories are available to support studies in human-computer interaction and experiments with computer networks, as are general purpose computing laboratories that are available to all students. A large number of computing languages and special-purpose software tools are available on various platforms. While instruction and research are on the leading edge of information systems, the department endeavors to keep class sizes small to facilitate student and faculty interactions.

Financial Assistance

Financial assistance is available to graduate students in the form of assistantships and fellowships. Research opportunities for advanced students exist. For application forms, contact the department.

Additional Information

Contact us at 573-341-7216, bit@mst.edu or visit http://bit.mst.edu.

Admission Requirements

In addition to the requirements set by the office of admissions and the office of graduate studies, specific requirements for admission to the M.S. in information science and technology (thesis or non-thesis) are as follows:

- Successful completion of an undergraduate degree from a recognized college or university with a GPA (grade point average or international equivalent) of 3.0/4.0 or better.
- Submission of scores from the Graduate Record Exam (GRE) or the Graduate Management Admissions Test (GMAT).
- TOEFL or IELTS scores must be submitted if English is not the candidate’s natural language.
- Undergraduate coursework in Calculus; Statistics; Object-oriented Programming with Data Structures; Information Systems; Relational Database Management Systems; and Computer Architecture must be shown.

***Please note that meeting the above requirements does not guarantee admission into the M.S. in information science and technology, but, rather, is used by the admissions committee in the decision-making process***

Degree Requirements

M.S. with thesis: The M.S. degree with thesis requires the completion of 24 hours of graduate course work (5000-level or above), 6 hours of research, and the successful completion and defense of a research thesis.

M.S. without thesis: The M.S. degree without thesis requires the completion of 30 hours of graduate course work (5000-level and above). Courses below the 5000-level will not count toward the M.S. degree, even if they are taken to fulfill prerequisites.

The following core courses are required of all M.S. students in information science and technology. These courses are designated to ensure that all IS&T masters students study the four information systems perspectives of networks and web design, human perception, application implementation, and organizational systems.

The department of business and information technology offers a variety of graduate certificates. Each certificate program consists of four courses and is open to persons holding a bachelor’s, master’s or Ph.D. degree in areas such as business, social sciences, technology,
engineering, or related disciplines who have the required pre-requisites for the courses in the program. A student must maintain an average cumulative grade point of 3.0 or better on a 4.0 scale in the certificate courses in order to receive the graduate certificate.

Students may apply to be admitted only to a graduate certificate program. If admitted, the student will have non-degree graduate status but will earn graduate credit for the courses completed. If a student completes the four graduate certificate courses with a grade of B or better in each of the courses taken, the student may be admitted to the master of business administration or to the master of science in information science and technology if the student so chooses. A student must, however, follow the normal application process and meet the undergraduate coursework prerequisites. The graduate certificate credits will count toward the student’s MBA or M.S. degree.

Details about some of the graduate certificates are listed below; others are listed in the business administration section of the catalog.

**Al, Machine Learning and Automation in Business**

Artificial Intelligence is a disruptive technology in the business realm with transformational impact. From detecting malware and preventing money laundering to automating insurance claims and optimizing inventory and improving product recommendations and more, AI will continue to necessitate changes in core business processes and models. Within the past few years, machine learning, while not fully tapped in the business sphere, has become more effective and widely utilized. Tomorrow’s leaders and managers will need to integrate machine learning where appropriate, incorporating its capabilities with those of humans. The design and implementation of new combinations of technologies with human skills to meet customers’ needs will require critical thinking skills, creativity, and project planning.

**Required Core Courses:**
- BUS 5730 Machine Learning and Artificial Intelligence for Business
- IS&T 5535 Machine Learning Algorithms and Applications

**Elective courses (choose two):**
- IS&T 5420 Business Analytics and Data Science
- IS&T 5520 Data Science and Machine Learning with Python
- IS&T 6443 Information Retrieval and Analysis
- IS&T 5445 Database Marketing
- BUS 6723 Artificial Intelligence, Robotics, and Information Systems Management
- ERP 6220 Data Modeling & Visualization Prototyping for Enterprise Decision Dashboard

**Business Analytics and Data Science**

Data analytics facilitates realization of objectives by identifying trends, creating predictive models for forecasting, and optimizing business processes for enhanced performance. Three main categories of analytics are:

- Descriptive - the use of data to find out what happened in the past.
- Predictive - the use of data to find out what could happen in the future.
- Prescriptive - the use of data to prescribe the best course of action for the future.

Big data is an emerging phenomenon. Computing systems today are generating 15 petabytes of new information every day—eight times more than the combined information in all the libraries in the U.S.; about 80% of the data generated every day is textual and unstructured data.

This graduate certificate is one of three graduate certificates offered by cooperating departments at Missouri S&T to fulfill the needs in the area described as “big data.” The other two graduate certificates are:

- Big Data and Security
- Big Data Management and Analytics

**Required Core Courses:**
- IS&T 5420 Business Analytics and Data Science
- IS&T 5450 Introduction to Information Visualization

**One course from the following:**
- BUS 5730 Machine Learning and Artificial Intelligence for Business
- IS&T 5520 Data Science and Machine Learning with Python
- ERP 5410 Use of Business Intelligence
- COMP SCI 5204 Regression Analysis
- COMP SCI 5402 Introduction to Data Mining
- COMP SCI 6354 Cloud Computing and Big Data Management
- COMP ENG 6330 Clustering Algorithms
- STAT 5814 Applied Time Series Analysis

**Business Intelligence**

Interest in business intelligence has been a recent strong theme among employers. Medium and large-sized businesses are especially interested. In order to make appropriate decisions, upper-level administration of an organization needs to draw data together from different systems in order to get a unified picture of the status and performance of an organization and present it in helpful ways. Examples include the development of organizational scorecards, dashboards, and other tools that provide a picture of how an organization is performing. People capable of creating and maintaining such information are needed.

This graduate certificate focuses on the technologies that allow an organization to make effective business decisions based on operational data pulled together from many different sources inside and organization. The target audience consists of any individual who would manage any type of IT professionals, database administrators, business analysts, and any person who would need to understand the technologies and their capabilities.

A student admitted to this graduate certificate must complete four courses:

**Required core courses:**
- ERP 5410 Use of Business Intelligence
- IS&T 6444 Essentials of Data Warehouses
- ERP 6610 Advanced Customer Relationship Management in ERP Environment
- BUS 6542 Supply Chain and Project Management
Two courses from the following list:
- ERP 5110 Enterprise Resource Planning Systems Design and Implementation
- ERP 5210 Performance Dashboard, Scorecard and Data Visualization
- ERP 6610 Advanced Customer Relationship Management in ERP Environment
- ERP 6220 Data Modeling & Visualization Prototyping for Enterprise Decision Dashboard
- IS&T 6443 Information Retrieval and Analysis
- IS&T 5445 Database Marketing

Cybersecurity and Information Assurance Management

Cybersecurity is one of the fastest growing employment segments in IT. As technology grows and progresses, with our devices and lives becoming more and more interconnected, the challenges of cybersecurity and information assurance will continue to grow. This presents a career to those with the necessary skills that will be exciting, rewarding, fast-paced, and highly sought after.

A student admitted to this graduate certificate must complete four courses:

Required core courses:
- BUS 5910 Privacy and Information Security
- IS&T 5780 Human and Organizational Factors in Cybersecurity

Two courses from the following list:
- ERP 5240 Enterprise Application Development and Software Security
- IS&T 5355 Fundamentals of Mobile Technology for Business
- IS&T 6336 Internet Computing and the Internet of Things
- IS&T 6641 Advanced Digital Commerce and IoT Analytics
- IS&T 5520 Data Science and Machine Learning with Python

Digital Media and Web Design

Digital media is growing as consumers change the way they access information. In pursuing this certificate, students will acquire the skills and knowledge to create, design and analyze digital media. The focus will be on the media itself, the social/digital network that connects these media, the interfaces that connect these media with users, and the application of these skills in business and other creative contexts. This certificate program will address the pressing demand and opportunities for graduates with advanced knowledge and skills in areas such as networked communication and marketing, web-based media creation and design, and methods for designing and building effective human-media interfaces.

A student admitted to this graduate certificate must complete four courses:

Required core course:
- IS&T 6654 Advanced Web Design and Digital Media Studies

Two courses from the following list:
- IS&T 5680 Digital Media Development and Interactive Design
- IS&T 5885 Human-Computer Interaction and User Experience
- MKT 5310 Digital Marketing and Promotions

One course from the following:
- IS&T 5652 Advanced Web Development
- IS&T 5886 Prototyping Human-Computer Interactions
- IS&T 5168 Law and Ethics in E-Commerce

Digital Supply Chain Management

Success in today’s marketplace requires that organizations deliver products and services that provide easily identified value for their customers. This certificate draws on strengths within two departments to integrate source (strategic procurement and supply management), production (manufacturing and service operations), and delivery processes (demand fulfillment), with a focus on the use of information technologies as the critical enabler of supply chain efficiencies and responsiveness.

The certificate is designed to give students the tools and ideas that help shape and define the various components of value creation. Students can gain knowledge and skills in the full spectrum of supply chain activities: supplier relationships, purchasing management, operations and inventory management, logistics and transportation, quality management, and information technology.

A student admitted to this graduate certificate must complete four courses:

Required core courses:
- ERP 5110 Enterprise Resource Planning Systems Design and Implementation
- ERP 5310 Supply Chain Management Systems in an ERP Environment

One course from the following list:
- MECH ENG 5708 Rapid Product Design And Optimization
- ENG MGT 5614 Supply Chain Management Systems
- BUS 6425 Supply Chain and Project Management

One course from the following list:
- ERP 5410 Use of Business Intelligence
- ERP 6120 Enterprise Resource Planning: Systems Config and Integration
- ERP 6610 Advanced Customer Relationship Management in ERP Environment
- MECH ENG 5656 Design For Manufacture
- MECH ENG 5757 Integrated Product And Process Design
- MECH ENG 5760/ AERO ENG 5760 Probabilistic Engineering Design
- MECH ENG 5763 Computer Aided Design: Theory and Practice
- BUS 5360 Business Operations

Electronic and Social Commerce

Social commerce is just one sub-set of e-commerce, however it is growing rapidly. The department of business and information technology (BIT) has leveraged its’ strengths in both business and technology for this program, which is designed to create successful students by developing skills in technological business practices that will provide opportunities for succeeding in today’s fast paced world. To that end, the program focuses on the following competencies:

- Management concepts applied to IT
- Management concepts applied to support of electronic commerce
- Use of business processes in IT integration
- Competitive advantage through IT
- Electronic commerce through collaborative shopping

A student admitted to this graduate certificate must complete four courses:

Required core courses:
- IS&T 6641 Advanced Digital Commerce and IoT Analytics

Core Courses (choose one or two):
- IS&T 5251 Management and Leadership of Technological Innovation
Human-Computer Interaction and User Experience

There is a growing demand within industry for workers with expertise in human-computer interaction (HCI), who generally hold titles such as interface designer; usability researcher analyst; usability engineer; user experience specialist; or information architect. HCI specialists bridge the gap in organizations between groups who build the technologies and groups who use the technologies. The qualifications for these positions generally fall into the following categories:

- Knowledge of human-computer interaction principles
- Skills in collecting user requirements
- Skills in developing prototypes, both low fidelity (e.g., paper) and high fidelity (e.g., html mock-up)
- Skills in evaluation of the impact of technologies on humans

A student admitted to this graduate certificate must complete four courses:

Required core courses:
- IS&T 5885 Human-Computer Interaction and User Experience
- IS&T 5886 Prototyping Human-Computer Interactions
- IS&T 5887 Human-Computer Interaction Evaluation

One course from the following:
- IS&T 5680 Digital Media Development and Interactive Design
- IS&T 6887 Research Methods in Business and IS&T
- IS&T 5168 Law and Ethics in E-Commerce

Mobile Business and Tech

Interest in the use of mobile technology and digital transformation among organizations has seen a strong, upward trend over the past few years. Indeed, many organizations now have Chief Digital Officers, whose role differs from the Chief Information Officer. The CDO’s role is principally centered around positioning the organization to leverage emerging technologies, in contrast to the CIO’s role of supporting existing technologies.

People capable of creating and maintaining digital technology strategies are needed.

This certificate is designed to cover managing emerging technologies. The focus will be on allowing an organization to make decisions in this dynamic domain.

A student admitted to this graduate certificate must complete four courses:
Three courses from the following list:

- IS&T 5335  
  Fundamentals of Mobile Technology for Business
- IS&T 6641  
  Advanced Digital Commerce and IoT Analytics
- IS&T 6654  
  Advanced Web Design and Digital Media Studies
- IS&T 6723  
  Artificial Intelligence, Robotics, and Digital Transformation
- ERP 5240  
  Enterprise Application Development and Software Security

Elective courses (choose one):

- ERP 5210  
  Performance Dashboard, Scorecard and Data Visualization
- ERP 5240  
  Enterprise Application Development and Software Security
- ERP 6641  
  Advanced Digital Commerce and IoT Analytics
- IS&T 5652  
  Advanced Web Development
- IS&T 5886  
  Prototyping Human-Computer Interactions
- IS&T 5168  
  Law and Ethics in E-Commerce
- IS&T 5680  
  Digital Media Development and Interactive Design
- MKT 5310  
  Digital Marketing and Promotions

Randy Lawrence Canis, Adjunct Professor  
JD University of Missouri-Columbia  
Privacy and information security law, patent law, intellectual property for computer scientist, legal environment for engineers.

Langtao Chen, Assistant Professor  
PHD Georgia State University  
Data analytics, human-computer interaction, social media, health informatics, machine learning, gameful design.

Yu Hsien Chiu, Teaching Professor  
MASTER University of Wisconsin-Milwaukee  
Enterprise resource planning, management information systems, business intelligence.

Cecil Chua, Associate Professor  
PHD Georgia State University

Cassandra Carlene Elrod, Associate Professor  
PHD University of Missouri-Rolla  
Marketing in higher education, operations management, supply chain management, continuous improvement, project management, quality, and lean enterprise.

Li-Li Eng, Associate Professor  
PHD University of Michigan Ann Arbor  
Financial and managerial accounting, international accounting.

Hangxun Fang, Assistant Professor  
PHD Mississippi State University  
Strategic management, family business, entrepreneurship.

Nobuyuki Fukawa, Associate Professor  
PHD Louisiana State University  
Consumer behavior, marketing research, marketing strategy.

Michael Gene Hilgers, Professor  
PHD Brown University  
Modeling and simulation, leaning technologies, and human-computer interaction.

Bih-Ru Lea, Associate Professor  
PHD Clemson University  
Enterprise resource planning, performance dashboards, accounting information systems, data visualization, business process integration, and supply chain management.

Xiaoyu Li, Assistant Teaching Professor  
PHD University of North Carolina-Greensboro

Yu Liu, Assistant Professor  
PHD University of Oregon  
Empirical corporate finance, investment, OTC market, public finance, and political economics.

Fiona Fui-Hoon Nah, Professor  
PHD University of British Columbia  
Management information systems, E-commerce, mobile commerce, human-computer interaction.

Elizabeth Ortmann, Adjunct Instructor  
JD Loyola University Chicago

Keng Leng Siau, Professor  
PHD University of British Columbia  
Artificial intelligence/machine learning, business intelligence/analytics, design science, mobile, and ubiquitous business.

Sarah Margaret Stanley, Associate Professor  
PHD Saint Louis University  
Brand relationships, advertising effectiveness, social marketing and its effects on consumer brand choice.

Wen-Bin Yu, Associate Professor  
PHD University of Louisville  
Business intelligence, text mining, data mining, demand forecasting, simulation, and agent bases systems.

Hongxian Zhang, Associate Professor  
PHD University of Texas at San Antonio  
Corporate finance, investments, public pension funds.

Wangchuchu Zhao, Specialist  
MS Missouri University of Science and Technology

Cui Zou, Specialist  
MS Missouri University of Science and Technology

IS&T 5000 Special Problems (IND 0.0-6.0)  
Problems or readings on specific subjects or projects in the department. Consent of instructor required.

IS&T 5001 Special Topics (LEC 0.0-6.0)  
This is designed to give the department an opportunity to test a new course. Variable title.

IS&T 5040 Oral Examination (IND 0.0)  
After completion of all other program requirements, oral examinations for on-campus M.S./Ph.D. students may be processed during intersession. Off-campus M.S. students must be enrolled in oral examination and must have paid an oral examination fee at the time of the defense/ comprehensive examination (oral/ written). All other students must enroll for credit commensurate with uses made of facilities and/or faculties. In no case shall this be for less than three (3) semester hours for resident students.

IS&T 5099 Research (IND 0.0-15)  
Investigations of an advanced nature leading to the preparation of a thesis or dissertation. Consent of instructor required.
Introduction to Information Visualization (LEC 3.0)
Topics include: the visualization development framework, traditional presentations of data, human perception and aesthetics, colormaps, data theory, visualization algorithms and software, modern visualizations of large data sets. Application of R packages will be emphasized throughout. Prerequisites: Statistics, Calculus, and Programming Knowledge.

Data Science and Machine Learning with Python (LEC 3.0)
Examines data science methodologies for scraping, manipulating, transforming, cleaning, visualizing, summarizing, and modeling large-scale data as well as supervised and unsupervised machine learning algorithms applied in various business analytics and data science scenarios. Python libraries such as Pandas, NumPy, Matplotlib, and Scikit-learn are utilized. Prerequisites: One of Stat 3111, Stat 3113, Stat 3115, or Stat 3117; one of IS&T 1552, IS&T 1562, Comp Sci 1575; for Graduate Students: knowledge of calculus, statistics, and programming.

Machine Learning Algorithms and Applications (LEC 3.0)
Introduces techniques of modern machine learning methods with applications in marketing, finance, and other business disciplines. Topics include regression, classification, resampling methods, model selection, regularization, decision trees, support vector machines, principal component analysis, and clustering. R programming is required. Prerequisites: One of Stat 3111, Stat 3113, Stat 3115, Stat 3117; one of IS&T 1552, IS&T 1562, Comp Sci 1575; or Graduate Standing with knowledge of calculus, statistics, and programming.

Advanced Web Development (LEC 3.0)
Advanced web development techniques to provide dynamic interaction; methods for extracting and delivering dynamic information to/from web servers - a hands-on approach. Emphasis on interaction with servers; mobile software development; processing of graphics and web video. Project work is required. Prerequisites: IS&T 4654; one of IS&T 1551, IS&T 1561.

Digital Media Development and Interactive Design (LEC 3.0)
This course covers techniques and tools for design and development of digital and interactive media, including text, graphics, animation, audio, and video. Prerequisites: A grade of "C" or better in IS&T 1551, IS&T 1561 or Comp Sci 1570.

Human and Organizational Factors in Cybersecurity (LEC 3.0)
In-depth examination of human and organizational factors in cybersecurity and information assurance. Study of how to protect information integrity, availability, and confidentiality, as well as tools, methods, principles, and analytics for fraud prevention, insider threat detection, and forensic investigations. Assumes prior exposure to cybersecurity or IA.

Human-Computer Interaction and User Experience (LEC 3.0)
Introduction to the field of Human-Computer Interaction (HCI). Students examine issues and challenges related to the interaction between people and technology. The class explores the social and cognitive characteristics of people who use information systems. Students learn techniques for understanding user needs, interface prototyping & interface evaluation.
IS&T 5886 Prototyping Human-Computer Interactions (LEC 3.0)
This course explores novel HCI and UX technologies as well as methods and tools for creating system prototypes, including best practices and guidelines for optimal user experiences. Example concepts include mobile applications, behavioral monitoring, gamification, natural user interfaces, haptics, and computers as social actors. Prerequisite: Preceded or accompanied by IS&T 5885.

IS&T 5887 Human-Computer Interaction Evaluation (LEC 3.0)
This course covers research and analysis methods and tools for evaluation of the impact of information technology systems on humans and organizations. The focus will be on practical evaluation with the goal of providing recommendations for improving system functionality and usability. Prerequisite: Preceded or accompanied by IS&T 5885.

IS&T 6000 Special Problems (IND 0.0-6.0)
Problems or readings on specific subjects or projects in the department. Consent of instructor required.

IS&T 6001 Special Topics (LEC 0.0-6.0)
This is designed to give the department an opportunity to test a new course. Variable title.

IS&T 6050 Continuous Registration (LEC 1.0)
Doctoral candidates who have completed all requirements for the degree except the dissertation, and are away from the campus must continue to enroll for at least one hour of credit each registration period until the degree is completed. Failure to do so may invalidate the candidacy. Billing will be automatic as will registration upon payment.

IS&T 6099 Research (IND 0.0-15)
Investigations of an advanced nature leading to the preparation of a thesis or dissertation. Consent of instructor required.

IS&T 6251 Technological Innovation, Entrepreneurship, and Economic Development (LEC 3.0)
Technological innovation is an important driver of entrepreneurship and economic development. The course covers essential practices, methods, and tools for successful innovation and entrepreneurship to enhance economic development.

IS&T 6261 Advanced Information Systems Project Management (LEC 3.0)
Project management principles, first from a general perspective, and then focused specifically on information system application development are explored. Topics include requirements analysis, project scheduling, risk management, quality assurance, testing, and team coordination. Report writing and research literature searches are required. Prerequisites: Strong programming knowledge required.

IS&T 6336 Internet Computing and the Internet of Things (LEC 3.0)
The course principally focuses on what's "under the hood" in the Internet. What are the underlying protocols and how do they work? How can constellations of devices (both traditional computing as well as Internet of Things) be configured into networks using the Internet Protocol suite to communicate with each other? Prerequisite: IS&T MS entrance requirements, including solid programming knowledge.

IS&T 6443 Information Retrieval and Analysis (LEC 3.0)
Covers the applications and theoretical foundations of organizing and analyzing information of textual resources. Topics include information storage and retrieval systems, web search engines, text mining, collaborative filtering, recommender systems. Students will also learn the techniques with the use of interactive tools such as SAS. Prerequisite: ERP 5410 or statistics knowledge.

IS&T 6444 Essentials of Data Warehouses (LEC 3.0)
This course presents the topic of data warehouses and the value to the organization. It takes the student from the database platform to structuring a data warehouse environment. Focus is placed on simplicity and addressing the user community needs. Project required. Prerequisite: IS&T 5423 or equivalent relational database experience. (Co-listed with ERP 6444).

IS&T 6448 Building the Data Warehouse (LEC 3.0)
Data modeling and processes needed to populate a data warehouse; tradeoffs among several models and tools; technical issues that are faced, such as security, schemas, Web access, other reporting techniques. Prerequisite: IS&T 6444.

IS&T 6450 Information Visualization (LEC 3.0)
Topics/activities include: the visualization development framework, traditional presentations of data, human perception and aesthetics, colorspace theory, visualization algorithms and software, case studies of modern topology, research into visualization algorithms and implementations in R. Students will produce significant programs and visualizations. Prerequisites: Statistics, Calculus, and Programming Knowledge.

IS&T 6461 Advanced Digital Commerce and IoT Analytics (LEC 3.0)
We discuss methods and techniques of data analytics on data from eCommerce websites and Internet of Things (IoT) devices that help create understanding of online business or detect patterns of IoT sensors. Challenges of data collection, key digital marketing metrics, and results interpretation and communication will be covered. Prerequisites: Knowledge of management information systems.

IS&T 6654 Advanced Web Design and Digital Media Studies (LEC 3.0)
The course covers web design and digital media, including topics such as social media, cyberculture, service design thinking, citizen journalism, crowd intelligence, brain-computer interfaces, privacy, and copyright. This course is an advanced version of Web Design and Digital Media Studies.
IS&T 6680 Advanced Digital Media Development and Interactive Design (LEC 3.0)
This course covers advanced techniques and tools for the design and development of digital and interactive media, including text, graphics, animation, audio, and video. This course is an advanced version of IST 4680, with additional assignments. Prerequisites: Some knowledge of programming.

IS&T 6723 Artificial Intelligence, Robotics, and Digital Transformation (LEC 3.0)
The course, designed for business executives, covers management of information to revitalize business processes, improve business decision-making, embrace emerging and disruptive technologies, and gain competitive advantages. The course also covers implications of AI, automation, machine learning, and robotics on business and society. MBA core. Prerequisites: Graduate standing. (Co-listed with Bus 6723).

IS&T 6780 Adv Human and Organizational Factors in Cybersecurity (LEC 3.0)
In-depth examination of human and organizational factors in cybersecurity and information assurance. Examines current challenges to protecting the integrity, availability, and confidentiality of information, as well as tools, methods, principles, and analytics for fraud prevention, insider threat detection, and forensic investigations. Project Required. Prerequisite: None, but recommended: IS&T 3333 or IS&T 6336 or Comp Sci 3600 or another introductory cybersecurity or information assurance course.

IS&T 6887 Research Methods in Business and IS&T (LEC 3.0)
This course covers quantitative and qualitative research methods for exploring the interaction between people and information technologies. The course covers techniques and tools for carrying out literature reviews, forming research goals, designing research, conducting data analyses; and preparing manuscripts and live presentations. (Co-listed BUS 6887).
