**ENGLISH AND TECHNICAL COMMUNICATION**

Missouri S&T’s Department of English and Technical Communication is the only program in Missouri to blend the humanistic study of English with the principles and practices of technical communication in a single degree program. The STEM-focused environment of S&T sets us apart from any of our peer programs in English or technical communication: it allows us to leverage S&T’s existing strengths in STEM and to focus on adaptive thinking and ethical training that today’s job market demands and that global citizenship requires. The ETC program provides students with innovative undergraduate research and coursework opportunities that do not exist in traditional departments, including the chance to complete several client-based classroom projects that allow students to collaborate professionally with customers and other colleagues. The ETC program teaches students to use technology in order to make complex topics understandable and to make information usable. As a result, our graduates are in high demand and find career opportunities in a wide range of professional domains, including engineering, health care, technology, education, publishing, government, natural sciences, and nonprofits. ETC majors at S&T can even earn a master’s degree in technical communication with only one additional year of study past graduation.

The interdisciplinary nature of the ETC degree at Missouri S&T enables you to acquire the qualifications you need to be competitive and flexible in an ever-changing technological environment. When you graduate, you will have a solid technical background in computer-enhanced information systems, an understanding of how organizations function, and strong communication skills. Areas employing our graduates include computer manufacturing and software development, consumer electronics, banking and financial institutions, telecommunications, chemical and pharmaceuticals, hospitals and research labs, and academic institutions and libraries. Our graduates become teachers, writers, editors, designers, and managers, and they hold job titles such as UI/UX Manager, Operational Excellence Analyst, Social Media Strategist, Visual Information Specialist, and Senior Technical Writer.

In technical communication courses, you will study both the theory and practice of communication in written, oral and visual forms, and produce a variety of technical documents in print, electronic, and digital forms. Because technical communicators work at the interface of technical experts and product users, you will gain experience with project management in a user community and become adept in audience analysis, needs assessment, document design, and team building.

English coursework involves the study of language, literature, and culture. Topics include literary history, criticism, literary forms, and detailed examinations of individual authors. Additional genre and theme courses are available, including world literature, literature and film, and science fiction. Linguistics and writing courses include the history and structure of the English language, advanced composition, and creative writing. Speech and media studies courses focus on oral modes of communication and the social dynamics of leadership in groups and organizations.

If you plan to become a secondary school teacher of English/language arts, the department offers an emphasis area in secondary education.

Eleven minors are available. American studies, creative writing, literature, writing, technical communication, literature and film, linguistics, social media in industry, game studies, communication studies, and leadership communication. You can major in any other academic field and minor in these areas.

**Bachelor of Science English & Technical Communication**

Students must complete a minimum of 120 hours for a Bachelor of Science in English & Technical Communication, and obtain a grade point average of 2.0. These requirements for the B.S. are in addition to credit received for basic ROTC.

Math and Sciences. Students must take 18 hours of math and science courses, including at least one in biological science and one in the physical sciences and at least one math course at the level of college algebra or higher. In addition to these requirements, students may count STAT 1115, up to 3 hours from psychology classes, and up to 3 hours from history of science and technology classes (HISTORY 2510, HISTORY 3510, or HISTORY 3530), but may not use them to satisfy another requirement.

Humanities. Students must complete 9 hours in humanities with at least one course from each of the following: literature, philosophy, and fine arts (Art, Music, or Theater Appreciation).

Social Sciences. Students must complete 12 hours in social science courses. Students must take at least one course in two of these four areas: economics, history, political science, and psychology.

One of the following courses must be taken to satisfy the requirement of the state of Missouri (the "Williams Law"); this course may count toward fulfilling the social sciences requirement:

- HISTORY 1200 Modern Western Civilization
- HISTORY 1300 American History To 1877
- HISTORY 1310 American History Since 1877
- POL SCI 1200 American Government

**English and Technical Communication.** Students must complete 33 credit hours of courses in ENGLISH and/or TCH COM. The student must earn a grade of C or better in these required courses.

All students must take the following 9 hours for the major:

- ENGLISH 2410 Theory Of Written Communication
- TCH COM 5620 Research Methods in Technical Communication
- TCH COM 4410 Theory and Practice of Technical Communication

Each student chooses at least one of the following CORE MODULES, which helps define each student’s focus for the degree and provides foundational skills within that focus:

I. Technical Communication (12 hours):

- TCH COM 1600 Introduction to Technical Communication
- TCH COM 2540 Layout and Design
- TCH COM 5510 Technical Editing

One of the following:
ENGLISH 1211, ENGLISH 1212, ENGLISH 1221, ENGLISH 1222.

2. ENGLISH 2002 Critical Approaches to Literature.

3. Capstone course for major: TCH COM 4410.

4. Fifteen hours of course work at the 2000 or 3000 level in English and American literature,
   including two courses in English Literature; and two American Literature courses, including literature for adolescents.

5. Six hours of linguistics.

6. Twelve hours of writing, including a course in the teaching of writing.
   Six of these hours will also be satisfied by the general education composition requirement for the B.S. degree; three of these hours will also be satisfied by the capstone course.

7. A minimum of fifteen hours must be at the 3000 level or above.

Graduate Track Pathway to MS in Technical Communication:
An undergraduate in the Department of English and Technical Communication at Missouri S&T, and select undergraduates in other departments, may opt to apply for the Graduate Track Pathway in Technical Communication (TC). This program allows a student to complete a bachelor's degree and then the MS in Tech Com in less time than if pursuing each degree consecutively. In this program, 9 hours of TC MS coursework may apply to both the BS and MS requirements. The credit hours transferred from their Missouri S&T bachelor's degree to their Technical Communication master's degree may be taken at the lower undergraduate tuition rate.

To be eligible for the GTP, an undergraduate must be one year from completion of their bachelor's degree (excluding the semester in which they are currently enrolled). They must have completed 9 credit hours of any combination of English and TC courses selected from 1160, 1600, 2002, 2410, 2540, 2560, and any 3000 or 4000 level English or TC course at Missouri S&T with at least a 3.50 GPA in those courses and a cumulative GPA of 3.0 or higher.

To be admitted, the student must complete the GTP Admission and Course Approval Form and must have the recommendation of a TC faculty member. Once admitted to the GTP, the student may transfer nine credit hours from their Missouri S&T bachelor's degree to their Technical Communication master's degree. Depending on the bachelor's program, some or all of those hours might also fulfill elective undergraduate categories. These nine hours of shared credit will be charged at the undergraduate tuition rate. The nine hours of shared-credit coursework must be approved by the academic advisor and must be courses approved to be part of the MS curriculum. Taking additional courses for graduate credit beyond these nine hours will require formal application and acceptance to the MS program. Acceptance to the MS program from the GTP is assured so long as the student maintains a 3.0 GPA or higher in TC coursework.

E&TC majors are encouraged to consult with their academic advisor during their sophomore or junior year about preparing for GTP admission.

English Minor Curriculum
All students who minor in English and technical communication must have a minor advisor in the ETC department, must complete a minor form, and must file it with the ETC department. (ENGLISH 1120 Exposition And Argumentation cannot be counted.)

English offers nine minors:

Literature
To complete this minor, students must take 12 hours of Literature courses offered by the English department; at least 9 hours of these must be at the 2000 or 3000-level.

Linguistics
The field of linguistics provides a view of language that students are often not exposed to during their K-12 education. Linguists are interested in the systematic study of language with particular interest in how people use language to establish their identities and situate themselves in the world. Being exposed to this view of language opens up new modes of thinking for students. In particular, by taking courses in linguistics, students gain an understanding of not only the basic prescriptive rules for correctness that are expected in certain written and spoken genres but also the patterns and features that comprise actual, real-world linguistic usage in a number of different speech communities—patterns that sometimes violate the prescriptive rules. Such an approach cultivates students’ ability to use prescriptively correct language in their speech and writing, which benefits them in future situations in which such correctness is required. Moreover, and perhaps even more importantly, students also gain an increased awareness of the systematic ways in which individual speakers and particular speech communities deviate from the prescriptive norms, using language to foster cultural and social connections and to establish their identities. Such awareness provides students with a new lens through which to view variation and diversity, which can contribute to greater tolerance and acceptance for linguistic—and thus human—difference. Furthermore, with an understanding of linguistic variation as rooted in the principles of multilingualism and intercultural contexts, students can develop specific skills in cross-cultural communication and linguistic accommodation, which will benefit them in future interactions with culturally and linguistically diverse speakers in their jobs and in their everyday lives—situations which are very likely to arise for our students in this increasingly globalized world in which transnational companies and multicultural communities are the norm.
