

# DISTANCE LEARNING

---

## Distance Programs

Through distance education, S&T offers graduate programs in business, psychology, technical communication, science, technology, and engineering, of which many are nationally ranked. S&T's unique approach to delivering distance programs is designed for working professionals. Visit [distance.mst.edu](http://distance.mst.edu) (<http://distance.mst.edu/>) for a list of graduate degrees and certificate programs offered through distance education. For more information, contact us at 573-341-6591, or email [global@mst.edu](mailto:global@mst.edu). ([global@mst.edu](mailto:global@mst.edu))

## Professional and Continuing Education

"Never stop learning" is the motto for professional and continuing education (PCE). We provide programs for all ages, beginning in grade school and continuing through one's professional career. Youth programs with STEM-focused learning encourages students to expand their knowledge and career choices. Professional development opportunities are promoted through technical short courses, seminars, webinars, conferences, and online training. PCE is a conduit to access knowledge experts for program development and supports full-service event planning and logistics. For more information, contact us at 573-341-4200, email [pce@mst.edu](mailto:pce@mst.edu) or visit [pce.mst.edu](http://pce.mst.edu). (<http://pce.mst.edu/>)

## Classroom Technology

To support teaching and learning, IT supports a broad set of instructional technologies. In addition to CLCs, classroom presentation technology, such as podium computers, webcams, Wacom drawing tablets, projectors, and speakers, are provided to enhance the ability of instructors and teaching assistants to present course materials and use student response systems (clickers) in the classroom.

The Media Services team is made up of professional video producers, audio technicians and graphic designers who collaborate with faculty and staff to create recruitment, research, commencement and other various videos. They are also the administrators of our campus Zoom Webinar license available to campus.

The Learning Environments team designs, implements and supports the technology that helps provide faculty and students the best possible learning experience. Our environments include 100+ classrooms, 50+ computer labs, and many full production studio classrooms. We also support numerous instructional software tools. These tools range from lecture capture and delivery, to virtual desktop environments and Canvas-our learning management system. We work directly with faculty to ensure all required software is deployed in our computer labs across campus.
